

MSSC Certified Logistics Associate/Technician

This Manufacturing Skill Standards Council (MSSC) program consists of 48 contact hours delivered in a blended approach of both instructor-led and e-learning instructional formats.

The course provides students with the foundational broad knowledge they will need to understand the world of supply chain and related core competencies. The course includes modules on the global supply chain, logistics environment, safety, safe equipment operation, material handling equipment, quality control, workplace communication, teamwork, and problem solving.

Participants will develop high-performance supply chain and logistics skills through lectures, self-paced studies, presentations and individual/group activities both inside and outside of the classroom. Soft Skills training will also be covered as part of this program.

At the end of the class, each participant will sit for the national MSSC CLA exam.
